

Noistop® Essential

Acoustic fence modules

Noistop® Essential

The look & feel

While people are living closer together than ever, peace of mind can be hard to find. The demand for good quality noise fences is increasing, requesting solutions that not just look good but are affordable and durable, all at the same time.

The high-quality Noistop® Essential acoustic fence is perfect for those who want it all. With a range of design options to choose from, durability, and an affordable price, noise reduction has never been so easy and stylish!

An easy modular system

Noistop Essential is a versatile modular system that allows for many different combinations. The wooden cladding, available as an accessory, can be easily mounted onto the module using a simple fixing technique. This means that there will be no trouble when you need to install, maintain, or disassemble it.

Design without compromise

While Noistop Essential is fully functional and good looking on its own in the galvanized appearance or a trendy black powder coating, you can optionally personalize the design with our decorative wooden cladding in a natural or a warm brown painting. Even customized panels can be used and provides customers and their architects the freedom to create the perfect style for their noise reducing fence without any limits. Finally, neighbours no longer need to compromise on style, as both sides of the module can suspend a different type of deco panel, now or later.

Easy installation and maintenance

The Noistop Essential system is designed for easy installation and maintenance with several smart features. With its easy-to-adjust modules, you can tailor the fence's length to perfectly fit your needs. Plus, the deco panels are separate items and easily handled for aftercare.

Noistop® Essential

A wide range of design options

With our Noistop Essential acoustic fence you are not limited to just one style. By mix and matching the core options and deco panels you can create virtually any look you want. If you ever want a new look, simply switch out the decorative cladding, add planting, change colour of the wooden deco and create a new design. The possibilities are endless!

A noise fence for every home or business

Noistop Essential is the acoustic fence that offers both privacy and noise reduction. This makes it perfect for both residential, municipality and commercial applications. Businesses can use our fences to create a safe and comfortable environment for their employees, customers and neighbours. Municipalities can use it for reducing noise levels around schools, kinder gardens, sports courts such as padel- & tennis courts and public roads. For residents, our fences provide much-needed improvement from noisy heat pumps, roads or neighbours, so they can enjoy their homes to the fullest.

Noise reduction for peace of mind

The acoustic properties of Noistop Essential have been extensively tested, providing a high sound insulation in line with an effective sound absorption. This means that it will reduce the noise level by more than half, giving you the peace of mind, you need and deserve.

Sustainable at heart

At ROCKWOOL we are known for a robust heritage. ROCKWOOL has a long history of producing high quality stone wool for durable and sustainable building solutions. It is not just that mineral wool is an extremely durable product, ROCKWOOL is very serious about minimising the CO2-footprint of our products as well. In line with this philosophy our fences do have a long lifetime and are recyclable to the last part. In this way, Noistop takes care of a peaceful society and a cleaner planet, improving modern living.

Noistop Essential – The ultimate fence with acoustic properties!

Noistop Essential is the acoustic fence that has it all: Noise reduction, a wide range of design options and an easy modular system. Give us a call today and find out how we can help you create the perfect noise reducing fence for your home or business.
